**Java program** that calculates taxpayers' tax refunds using their tax information.

## Work Experience

**Integration Engineer at Net Synergy Virtual Solutions**

**July 2016 - Present**

Developed web-scraping robots using a mixture of Regular Expressions, the Kofax Kapow Robot Process Automation software, SQL, and JavaScript. Developed, tested, documented, and tracked projects as part of an Agile team using a combination of JIRA, Confluence, Git, and the MS Office Suite. Company documentation expert. Designed and adapted ETL projects (data warehousing) from conception up through development. Designed, setup, and administered company knowledge base in Confluence. Relational and nonrelational data modeling, and relational database design for SQL.

**Supervisor at Busch Gardens Tampa**

**December 2013 - June 2016**

Supervised admissions screeners and turnstiles employees including their breaks, attendance, training, audits, and moral. Troubleshooting and resolving guest ticket problems utilizing ticket database and associated database interface application. Maintained smooth daily operations of turnstiles while maximizing the flow of guests entering the park. Performed duties associated with opening and closing the park to guests such as daily testing of turnstile systems, ensuring area cleanliness, and updating various statistical data on guests. Attended to unexpected guest employee, and daily operational issues.

**Host at Busch Gardens Tampa**

**June 2013 – December 2013**

Operated rides, assisted guests, bused tables, maintained park cleanliness, and trained new employees. Received recognition for exceptional customer service.

**Personal Assistant at Heart Specialists of Sarasota**

**May 2011 – June 2012**

Interviewed patients, entered patient data and ran miscellaneous errands
